Priyanshu Dhyani

Software Development Engineer | Full-Stack (Next.js, React, Supabase, PostgreSQL)

Dehradun, Uttarakhand, India | +91-9808129751 | priyanshudhyani9808@gmail.com | github.com/priya-anshu | biolift.vercel.app

PROFESSIONAL SUMMARY

Software Development Engineer with hands-on experience building and shipping full-stack, production web applications using Next.js, React, TypeScript, and Supabase/PostgreSQL. Experienced in relational database design with row-level security, authentication and role-based access control (RBAC), REST API development, API performance monitoring, and CI/CD deployment on Vercel. Background in machine learning (TensorFlow/Keras) and data analysis (Python, Pandas).

TECHNICAL SKILLS

Frontend: Next.js, React.js, TypeScript, JavaScript, Redux Toolkit, React Router, Tailwind CSS, Framer Motion, HTML5, CSS3, Responsive Design
Backend & APIs: Node.js, REST API Design, Supabase Edge Functions, FastAPI, Firebase (Authentication, Firestore, Realtime Database)
Databases: PostgreSQL (Row-Level Security), MySQL, SQLite, MongoDB
Auth & Security: Supabase Auth, OAuth 2.0, JWT, Role-Based Access Control (RBAC)
Testing: Jest, React Testing Library, Unit Testing, Component Testing
Cloud & DevOps: Vercel (CI/CD), Netlify, Supabase, Cloudinary, Git, GitHub
Data Science & ML: Python, Pandas, NumPy, Matplotlib, Seaborn, TensorFlow, Keras, Scikit-learn, XGBoost, Random Forest, ARIMA, ETL Pipelines
Languages: JavaScript, TypeScript, Python, Java, C, C++

PROFESSIONAL EXPERIENCE

AI Trainer (Freelance) | Handshake AI

Remote | August 2026 - Present

- Benchmark and evaluate large language model outputs on coding tasks (Project Dynamo, Terminal-Bench), assessing accuracy, correctness, and reasoning quality.
- Previously evaluated image-based STEM reasoning questions to improve the quality of model training data.

Software Development Engineer - I | Edunosis Education

Delhi, India (Remote) | January 2026 - Present

- Sole engineer owning the full development lifecycle of 2 live production products: Build-O-Bot (STEM/robotics learning management system) and Vedavan (supplements e-commerce platform), both built with Next.js and Supabase.
- Implemented role-based access control (RBAC) with Supabase Auth and enforced multi-user data isolation using PostgreSQL Row-Level Security policies.
- Built an admin dashboard with real-time API performance monitoring, maintaining sub-200ms response times across endpoints.
- Designed and integrated a Cloudinary media pipeline for optimized image and asset delivery across both platforms.

Data Science Intern | The Developers Arena

Remote | December 2025 - June 2026

- Built a Python ETL pipeline integrating the OpenWeatherMap API with SQLite for automated data ingestion, transformation, and storage.
- Performed exploratory data analysis on 5 datasets across retail, healthcare, and finance using Pandas, Matplotlib, and Seaborn.
- Developed a CLI-based personal finance tracker using object-oriented Python and CSV file handling.

React Developer Intern | Pledgent Technologies Pvt. Ltd.

Remote, Part-time | June 2025 - August 2025

- Developed responsive user interfaces with React, React Hooks, and React Router; managed application state with Redux Toolkit.
- Integrated Firebase (Authentication, Firestore, Realtime Database) and styled interfaces with Tailwind CSS.
- Wrote unit and component tests with Jest and React Testing Library; deployed builds via Netlify and Vercel.

PROJECTS

BioLift - AI Personal Trainer Web Application | biolift.vercel.app

Next.js, Supabase, PostgreSQL, Tailwind CSS, Vercel

- Solo-built a full-stack fitness platform with a library of 75 base exercises and 375+ variations.
- Designed 20+ normalized PostgreSQL tables with Row-Level Security; implemented email/password and Google OAuth 2.0 authentication.
- Built 10+ dashboard routes covering workout tracking, progress analytics, and user management; deployed on Vercel with Git-based CI/CD.

Waste Classification - Deep Learning CNN

Python, TensorFlow, Keras, MobileNetV2

- Trained a convolutional neural network on 15,000 images using transfer learning (MobileNetV2), achieving 87%+ validation accuracy.
- Built a fully reproducible training and evaluation pipeline in Google Colab.

EDUCATION

Master of Computer Applications (MCA) | Graphic Era Hill University, Dehradun

2023 - 2025

Bachelor of Science, Information Technology (BSc IT) | D.A.V. PG College, Dehradun

2020 - 2023
